What is The Intuition?

Our Intuition is the elixir that flows through every cell in our body. There is

A sleeping giant within us and our intuition awakens us to it. Our Intuition is a part

Of our Divine Self, High Self. It is perfect, all wise, all loving, all knowing,

Our Divine Self is without fault or judgment. It is fearless, abundant, and

prosperous. It knows nothing about disease, problems, self-doubt, confusion or

conflict. We all have intuition; for it was given to us by God /Source. However,

We have to activate, this Divine energy for its Divine energetic, loving rays to

Radiate from your body out into the world. If you want to create a more peaceful,

The loving world, this is the way to do it. I feel it is important to us all, to learn

how to live from our “Divine Intuitive Self” because we become beacons of light,

love, joy, and harmony.

How The Intuition Works

There is a Sleeping Giant within us, and our Intuition helps us to awaken this Giant. We all have Intuition; it lies dormant inside us and needs to be **Ignited** for Us To benefit from its magic and power. However, it is important for us to trust Our Impressions and instinct. Do you trust yourself enough to trust your Intuition And allow it to develop and grow? Our Intuition can shed light on our energy field at The moment and give us clarity about what about what is going on in our lives. Our energy field can change hourly depending on the challenges we are confronting. It also can show a mixed energy field if something we are dealing with is long-standing and unresolved.

Why Develop and Grow Your Intuition

Statistic shows that 80% of our population is not using their intuition, to Guide and Direct their business decisions and sales. Can you imagine how your business and sales could improve with the use of your intuition, your inner psychic, And this is available to you 24/7. With a little training, you can develop, and Grow Your intuition to become your own business, and sales psychic. Our intuition is one of the three parts of our “Self,” and it has three parts.

They are **Inner Self, Outer Self, and Divine/Spiritual Self:**

1. The **Inner Self**, our inner core self-helps us with self-management. We have to learn how to manage our emotions because they influence our activity and energy. Here our intuition is important because it allows us to do, behave and act in a manner that keeps us integrated as a whole person. It is the glue that keeps our self-esteem intact. Our Inner Self-has five parts. They are: Self-Esteem/Self-Identity, Self-Image, Self-Respect, Self-Worth/Self Appreciation and Self-Confidence
2. The **Outer Self** is what we show to the world. It is the foundation upon which our house of Self (Inner Self) is the building. It is a combination of the Self-Identity, Self-Image, and Self-Confidence.
3. The **Divine Self** is housed in our conscious mind and is called our Intuition. Sometimes it is called our instinct and sixth sense; however, it is more than that. Here we are dealing with a power that is invisible, silent, and unable to be perceived by our five senses. We just have to accept and know there is an invisible, Power and Presence active in the universe and it is for everyone. It is all-wise, all-knowing and powerful. This universal Power and Presence becomes personal to us when we believe in it and believe it has the power to direct our lives in a positive direction if we allow it. It emits a bright light, sometimes called an aura, white light. It is this light that shows up when we tap

into our intuition and use it to solve a problem or for guidance and direction.

The white light that emits from our intuition is seen and referred to as our charisma. People are drawn like a magnet to persons with a charisma because they emit a white light that flows from our Superconscious/ Intuition and draws others into our energetic field and makes them want to connect with you.

It is to your advantage to increase your Aura (white light) to be noticed by others and seen as a leader and someone with influence to do business. With an increased intuition you are less likely to be deceived because you will have a better internal sense of the people you are dealing with, you are a better negotiator and radiate a positive, energetic field that surrounds you wherever you go. People are naturally attracted to you, and they do not know why. The reason they are attracted to you is that your charisma (your white inner light) is radiant, and it shines brightly. You project an inner white light that draws people like a magnet and will they sign up quicker for what you offer.

Have you noticed that all successful leaders have a white light (aura) that Draws people to them? You can have that “extra thing,” successful leaders have. Take the Intuition Course to see if your Intuition is it alive or dead. Reach out to me at: www.calendly.com/dridagreene/30min

As a leader, our intuition is the secret sauce that helps us get a sense of who,

is in a room and it helps us to find the leader or key players in a room so we can more easily connect with them. A key part of growing your leadership skills is to learn how to listen on a level three.

Level three Intuition listening is needed for you to “read” the energy in a room and get a sense of the energy flow so that you can read the fears, anxieties, and Objections in the mind of others making sales easier. Because you can gather people unspoken conversations.

If you would like to increase your attraction factor to be noticed by others, and seen as a leader and someone with influence to do business with, then increasing your intuition (inner wisdom) will help. With increased intuition you are less likely to be deceived, you will have a better sense of the people you are dealing with, be a better negotiator and radiate a positive energy field that surrounds you everywhere you go in our **live, Intuition Magic**, Group Coaching Program.

How to Tap Into Your Inner Wisdom

Here are some reasons why it is important to develop and grow your intuition:

1. To be a savvy business person, you will need to use your intuition to know who to speak within a business setting; when to approach them, and how you can best get their attention.

2. Your intuition will help you understand the silent words in a conversation. It will help you know others true intention, so you are not deceived. You can learn to recognize when you are being deceived by others, by being aware of your body language in their presence. I remember when I married my second husband; I was

extremely nervous, more than ever before in my life. A part of me wanted to call off, the wedding, however, I dismissed the signals my body gave me and later regretted it because my husband was hiding a dark side of himself that he did not show me. After our marriage, I discovered that: He was an alcoholic, had gone to prison for stealing social security checks from people mailboxes in Philadelphia, he was a womanizer and abuser of women. It took me a year to discover this information because he kept it hidden in the trunk of his car. When I found out this information, I tried to file an annulment to dissolve the marriage, and could not, because, we were married a little over one year. When I decided to leave him, he became physically abusive, and my life became a nightmare. My husband was 20 years older than me, and I got some wise advice from his daughter who was my age. She explained how she left her abusive husband. She also shared that her dad had abused her mom and that was why they were no longer married.

The last time my husband abused me, I asked myself a question and waited for an answer. I said to myself; I love me, and I do not hit me. If he cared for me, he would not hit me. Maybe he does not love me? It was then that I realized that I could not live with a man who did not love me. Also, I was becoming more enraged because I was not a match for his balled fist. He was an ex-boxer, and I realized that I had to put some distance between me and his balled fist.

I remember him telling me, that before he hit me again, he would cut off his right hand. I noticed that his hand was still on his body, and I became aware to the fact that he had no control over his hands and that I had to leave and divorce him. I had to learn how to take back my heart, and begin the long process to build my self-esteem, self-identity, and self-worth which he destroyed. I had to learn how to be a single woman again.

When your intuition is fully developed, you listen on a level three, inner listening.

Level One Listeners-listen to themselves, as well as the conditioning voices in their head and the mass of stimuli and impressions blasting at them daily. Here you live in a loud, chaotic world where you are constantly reacting; you are busy and unproductive.

Level Two Listening is when you are captured contently in a conversation with another; you are completely involved at the moment and connected.

Level Three Listening is your intuition. It is when you are listening to everything that is going on everywhere. It is a calm listening that goes beyond words where you use all of your inner resources; your inner wisdom, to get what is happening and will happen. You have an inner steadiness and access to the message of what is really happening around you, and you have an inner knowing that you know.

Everything is flawless and flows easily. What is getting a meeting with someone worth to you? Imagine landing the right client or getting ahead in your career by getting in contact with the right person. Most people would consider this an invaluable trait, so for a couple of cups of coffee, you can have the opportunity to learn how to do this for yourself through our Intuition Magic programs.
